

Gulnaz Begum

Hello, my name is Gulnaz Begum, and I have two sons and one girl, in past years, I was always at home as a housewife caring for my family.

I learned over time that there is more to life than being a housewife, so I began my educational adventure.

I successfully completed a four-year degree in Health and Social Sciences. I volunteered at GOAL throughout my final year of study to gain experience to pave a path into my future career.

After finishing my degree, I was offered an Early Years Practitioner role, and I am now working for GOAL.

I am currently working with families within the parent and toddler sessions to educate children through play, which consists of various activities set out each week.

I enjoy working in the early years department and I am very excited about this opportunity as this will extend my knowledge and experiences.
